

SERDI 2.0

Compact - Strong

The SERDI 2.0 proposes **the essence of the technology of SERDI** at the best price. Simple, fast machine of use and installation.

Machine dedicated to machining requiring a very high couple of pin at low speed.

- Capacity of machining of 0.551"/14mm to 4.725"/120mm.
- Equipped with new tools SERDI, decreasing the cutting pressures of 30 %, able to cut the hardest seats.
- Frame optimized by static and dynamic calculation. Modern, modular and functional design with integral lighting.
- Pneumatic fastening of the rules of table.
- Stitch at number of variable revolutions from 100 to 1000 tr/min per variator with vectorial regulation of flow in open loop (significant couple at low speed). Digital posting speed.
- Two directions of rotation.
- Recommended for diameters of guides higher than 0.275" / 7 mm.
